DETAILED ACTION

Response to Amendment

1. The amendment received on 11/14/2005 has been reviewed and considered with the following results:

The prior art rejections to the claims made in the previous Office Action, mailed on 6/14/2005, is now withdrawn in view of Applicant's amendments filed on 11/14/2005.

Therefore, the case is found to be in allowance condition.

REASON FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance:

Applicant has amended the base claims to include the claims that would be allowable if rewritten in independent form as stated in the previous Office Action. As to pending claims of the application, the prior art of record fails to disclose or fairly suggest a frequency synthesizer (as shown in Fig. 2), as recited in claim 4, having a very specific structural limitations as a phase/frequency comparator includes means for re-initialization of the first and second detector which are designed to deactivate one or the other of the detectors, when the active edge which it has detected has been taken into account by the flip-flop RS, such as the means for re-initialization generates a one shot pulse to initialize the first or second detector, respectively, when the active edge of which it has detected; a flip-flop RS, the inputs of which for setting to one and to zero are piloted respectively by the first and second input signals and an output of which is designed to emit the control signal; a first and a second detector for active edges of the

first and second input signals respectively, the output of which are connected to the inputs for setting to one and to zero of the flip-flop RS; the-phase/frequency comparator being designed such that the first regulation signal comprises a succession of pulses, each of which has a width which is modulated according to the frequency difference which exists between the first and second input signals; and being configured in combination with the rest of the limitations of the base claims and any intervening claims.

Claims 1 and 6 are allowed for similar reasons; note the above discussion with regard to claim 4.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
